

# Additional Questions

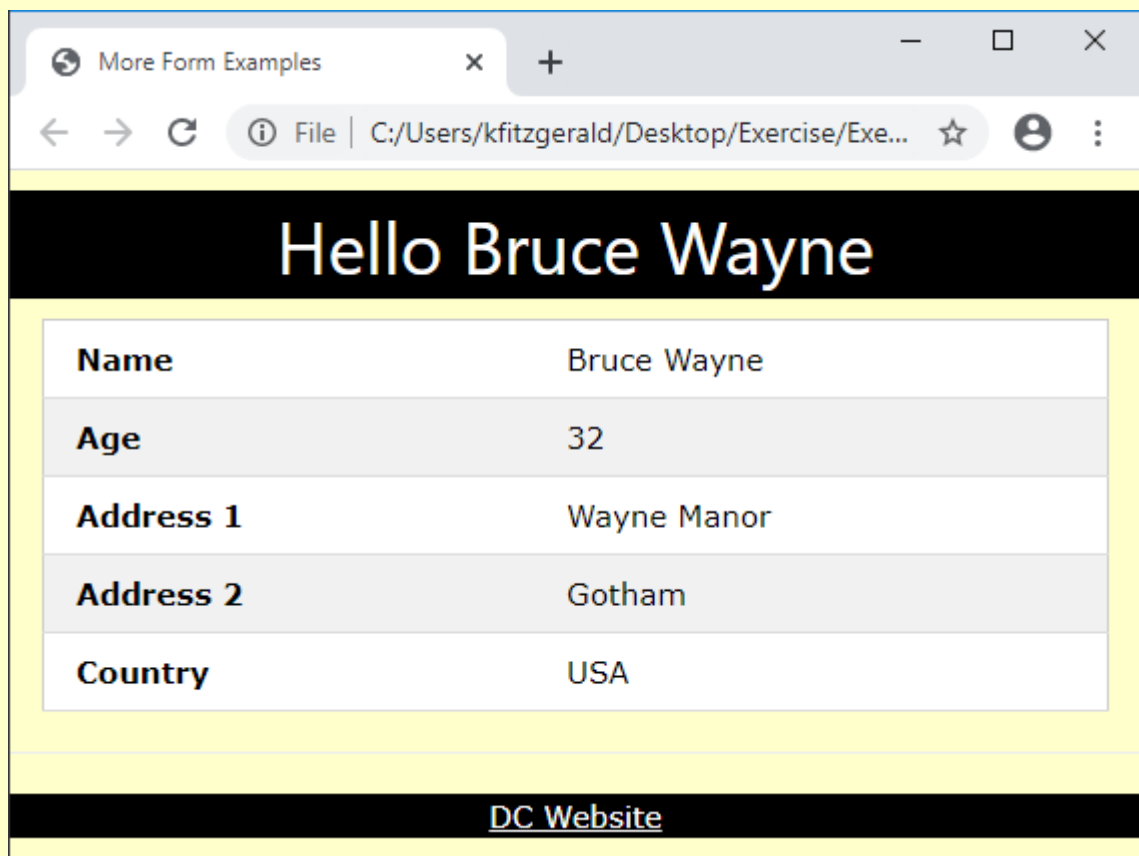

## Question

Q1.

- Create a web page that prompts the user for:
  - Name
  - Age
  - Address 1
  - Address 2
  - Country
- Create a table to display the result using the w3CSS stylesheet:

<link rel="stylesheet" href="https://www.w3schools.com/w3css/4/w3.css"/>

- Create a link to the official Batman DC page:  
<https://www.dccomics.com/characters/batman>
- Style the sheet as per the following screenshot.

Q2 styling a webpage.

1. Create a page that allows the user to set the colour for the body while also using the W3CSS style sheet.
2. The users must be asked for 3 numbers for the rgb colour for the background of the page (html tag)
  - a. Read the instruction at [https://www.w3schools.com/jsref/prop\\_style\\_backgroundcolor.asp](https://www.w3schools.com/jsref/prop_style_backgroundcolor.asp)
  - b. The numbers must be valid numbers between 0 and 255
  - c. The must be numerical, no text
  - d. This script must be just inside the body tag.

```
<body>
  <header>
    <h1 class="w3-bar w3-center w3-black">Information on The Batman</h1>
  </header>
  <main>
    </main>
    <div class="w3-container w3-centre ">
      <table class="w3-table-all w3-center">
        <tr><th>Name</th><td>Bruce Wayne</td></tr>
        <tr><th>Age</th><td>age</td></tr>
        <tr><th>Address 1</th><td>add1</td></tr>
        <tr><th>Address 2</th><td>add2</td></tr>
        <tr><th>Country</th><td>country</td></tr>
      </table>
    </div><hr>
    <footer>
      <div class="w3-bar w3-center w3-black">
        <a href="https://www.dccomics.com/characters/batman">DC Website</a></div>
      </footer>
    </body>
```
